

executive summary

Symplicity's Career Services Manager, (CSM) is a comprehensive turn-key Career Services management solution for Career Services staff, students and employers. CSM is designed for Career Services offices to enhance the way in which they process and share information both within the university and between their students and employers. CSM is the first product of its kind that integrates with the university's registrar, authentication, and campus portal systems including SAP, PeopleSoft, Campus Pipeline, uPortal and SCT Banner. CSM allows organizations to replace half a dozen niche products with a one-stop integrated solution for enterprise wide management of: job postings, employers, students, interview scheduling, placements, room management, web resume books, career fairs, alumni networking, calendaring, communications, customer relationship, and more.

Identify, analyze, and act on mission-critical information with newfound efficiency and accuracy.

CSM employs the Symplicity e-Business Platform, a comprehensive set of state-of-the-art proven solutions that enable organizations to enhance their business process and address their unique set of challenges. This customized set of real-time tools, enables universities to identify, analyze, and act on mission-critical information with newfound efficiency and accuracy, often resulting in better performance, while producing significant time and cost savings.
