Automate, simplify, and track the approval and delivery of accommodations

Accommodate is the only 508-compliant Software-as-a-Service solution, self-service portal and employee accommodation case management system on the market today.

**Use Accommodate To**
- Request accommodations
- Track cases
- Report to the OFCCP

Accommodate is a web-based tool used to manage employee accommodation requests. Users can easily review, assign and process accommodation requests through a system that seamlessly routes cases to the right people each time. Accommodate can also quickly generate detailed electronic records, making it simple and seamless to comply with audits conducted by federal agencies.
Symplicity is a market leader in enterprise technology and workflow management solutions for higher education, government, and corporate businesses. Our solutions have helped more than 41 million users over the past 20 years.

Apply your policies and procedures to build your accommodations list
