

Helping universities to develop career ready students

An institution-wide Student Engagement Platform to track and develop student career readiness

ABOUT UNI HUB

A new shift sees universities moving towards adopting an institution-wide strategy where the development of skills in students is no longer considered as the sole responsibility of the Career Services team. Other departments and faculties are already contributing towards the development of employability skills and this involvement will rise in the future.

Working with over hundreds of universities globally, we've seen that this change is happening fast and irreversible. This is why we developed UniHub - an institution-wide Student Engagement Platform for managing Events, Appointments, and Skill Development activities. UniHub builds on the existing CareerHub capabilities and provides additional functionality that appeals to the wider institutional usage of the platform. UniHub enables these contributions to be captured, measured, and incorporated into the student's career development and road to career readiness.

WHAT CLIENTS ARE SAYING

“Symplcity’s UniHub solution has transformed the way we manage and track student event attendance leading to higher student engagement, reporting and student satisfaction whilst reducing operational costs.”

Dr. Alan McAlpine, Associate Director, Strategic Partnerships, Student Success Group, QUT

BENEFITS OF ADOPTION

UniHub adoption is critical for the tracking of student skill development across work integrated learning such as internships, volunteering programmes, faculty and campus wide events, focused workshops on industries and functional areas, and advising appointments with faculties.

**UNPARALLELED
CUSTOMER
SERVICE**

We hire our support staff directly from the higher education field to ensure that they're experts at answering the exact questions you'll have.

FEATURES

- Activity and skill development tracking*
- Accurate, machine learning driven suggestions to increase student engagement*
